Professor of Economic History - Helsingin yliopisto

The industrial revolution was fundamentally a technological revolution, and progress in understanding it can be made by focussing on the sources of invention. This subject has been opened up for economists by the researches of Joel Mokyr (1990, 2002), and I will examine his views on macroinventions, the scientific revolution, and the industrial

Innovation during the Industrial Revolution

increased during the industrial revolution, the need to transport heavy fuel like coal and more finished products made transporting over land less effective. As a result, large canal systems were built all over England and other countries. #23 Technological Innovations of the Industrial Revolution 7
